Why is Terranea perfect for your family getaway?

When staying at Terranea, you forget you are in Los Angeles and feel like you are a world away, yet the resort is only 45 minutes from LAX and half hour to one hour from all the major Los Angeles areas and sites (SoFi Stadium, Crypto.com Arena, Disneyland, Hollywood, World Cruise Center, etc.)

Casitas and Villas are the most popular accommodations for families, as well as small group retreats looking for a creative space to gather. These exterior units have kitchens, designated/private parking and exterior entrances to their units.

There is plenty of space to roam and physical distance on our 102-acre resort. The resort has 75% green space with 270 degrees of ocean front views. Another fun fact is that the resort faces South overlooking Catalina Island. Guests may enjoy sunrise on the east side of the resort, sunset on the west side of the resort and sometimes even see the moon rise!

Guests are able to enjoy all Terranea has to offer including: 4 pools & waterslide, world-class spa, daily outdoor yoga & fitness classes, learning the sport of archery with a skilled archer, kayaking/stand-up paddle-boarding through the stunning kelp beds along the Terranea coastline, experiencing a private falconry session, exploring some of the many trails the Palos Verdes Peninsula has to offer by foot, bike or even horseback, teeing off with some friendly golf competition, painting the Palos Verdes coastline en plein air and bringing the keepsake home.

Plenty of outdoor and indoor dining options on property: mar'sel, catalina kitchen, bashi, Nelson's and The Lobby Bar and Terrace. Resort guests may also enjoy In-Room Dining or grab some quick bites and homemade desserts and gelato from seabears.

Guided by the philosophy of ecological sustainability, every effort has been made to protect and steward this unique environment, preserving one of Southern California's most scenic and coveted coastlines for future generations. This includes bioswales that filters storm water runoff prior to entering the ocean allowing the kelp forest to thrive leading to a healthier marine ecosystem. Through our efforts, we are able to harvest sea salt and kelp as well as release rehabilitated marine animals back to our waters.
