## Iceland Family Northern Lights Adventure

Iceland is one of the most geologically active areas on earth and offers visitors a unique opportunity to witness the creative forces of nature at work. With over thirty active volcanoes—and an abundance of glaciers, geysers, and waterfalls—Iceland is truly a land in formation. Runway Travel recommends this 7-day itinerary for families. Expert guides will take you to the rugged and beautiful nature destinations to experience a unique vantage point and enjoy chance encounters with locals, animals and the elements. The Northern Lights are visible from September to early April. Your guide will help you maximize your chances of seeing the Auroras. The hotels or villas you stay at in the countryside are optimally located for Northern Lights viewing.

## ITINERARY AT A GLANCE
